Companion
Hyderabad

Company Description
- Technologies: HTML5, CSS3, JavaScript, Bootstrap5.
- This project was completely about museum it gives a complete information about the artifacts. I have developed the dynamic HTML and css based on requirement for details page. I was first hand to work on data retrieving from JSON based on the user selection and worked on populating the details.

Artfact Management
Hyderabad

Company Description
- Technologies: HTML5, CSS3, JavaScript, Bootstrap5.
- Description : In this project I was exposure to json preparation and basic exposure to AWS Cognito usage. We have created Registration and login by using AWS Coginto in this project. By using AWS Cognito we can simplify the user login/register experience this is one of the basic essential tool we developed for Artifact Management.
